Product Datasheet

2000 Watt max., 120cm x 60cm Infrared Heating Panel with Intelligent Saving Temperature Control (ISTC)

The SUNNYHEAT™ radiant infrared heating system is a modular glass heating panel controlled by the wireless ISTC for use in residential homes or commercial buildings.

- Multiple installation options
- Programmable temperature settings by time and date
- Relay to add direct light fittings or concealed LEDs to the panel
- Runs silently with no maintenance required
- Wireless ISTC controller may be placed where needed; unnecessary to be wired in, powered by 4 AA batteries
- Modulating power consumption with PI regulation

2000W SUNNYHEAT™ IR HEATING PANEL:

Dimensions: 1195mm x 595mm x 35mm *(47" x 23.5" x 1.3")*
Weight: 11.6kg *(25.6 lbs.)*
Voltage: 220V-230V / 50~60Hz
Electrical connection: 3PIN Plug provided
Default power level during heating up: 1000W prior to PI regulation
Maximum power level during heating up: 2000W prior to PI regulation
Current at max. output: 9.1A (220V supply) / 8.7A (230V supply)
Heated surface: Tempered ESG safety glass, 4-6mm
Surface temperature: Default max. 120°C, adjustable to 215°C
Surface temperature (Picture Panel): Default max. 120°C, non adjustable
Power cable: 2m *(6.5 ft.)*
Radio frequency between ISTC and panel: 433.92MHz
Power switch on back of panel
Child-safe surface temperature setting
Protection against electrical shock (EN60335-1:94) Class II
IP rating: IP20
Australian Electrical Safety Certified - NSW25118
